Overview and Progression

Aims

Through our Art and Design curriculum, children develop their creativity and imagination. They study the work of a range of great artists, architects and designers, learning about the techniques they have used and then exploring how these can be used in new and different ways.

The topics covered in our curriculum engage, inspire and challenge pupils, equipping them with the knowledge and skills to experiment, invent and create their own works of art, craft and design. Children are also taught to think critically about their own work or that of others and to edit, revise and improve their work. Through studying a diverse range of artists, architects and designers, they learn how art and design both reflect and shape our history, and contribute to the culture of our nation.

Children develop their skills in resilience, resourcefulness, team work and critical thinking.
